WELCOME TO THE INTERNATIONAL ADVANCED BIOFUELS CONFERENCE
EUROPE IS READY FOR ADVANCED BIOFUELS!

Elite Hotel Marina Tower, Stockholm, Sweden

ORGANISED BY: SVEBIO
WELCOME TO THE ADVANCED BIOFUELS CONFERENCE 2019 IN STOCKHOLM!

The Swedish Bioenergy Association (SVEBIO) heartily welcomes participants across the globe to the beautiful city of Stockholm to attend our 5th Advanced Biofuels Conference on 17–19 September, 2019. Pre-conference study visits will be followed by two full conference days, a conference dinner cruise, a workshop, and cover all land, aviation and maritime transport sectors.

Advanced biofuels for Europe are key for reducing emissions in the national transport sectors. We have seen commercial breakthroughs in technologies, new policy measures adopted and changing business models, all which of are no longer on the horizon. This year, we invite you to participate in latest European policy, energy system transition to renewable fuels, partnerships, world class R&D and new technologies – with all the leading companies presented. More and more vehicles are certified with HVO100, to complement today’s selection of bio-CNG, E85, ED95, B100 as well as conventional fossil fuels blended with biofuels.

The conference will bring you an update on the value of advanced biofuels and business opportunities in the new bioeconomy. You will get leading international experts, unique networking, interesting study visits and a workshop on biofuels policy and biobased jet fuels. The Advanced Biofuels Conference is intended for people creating a sustainable transport sector. Speakers and delegates will be policy makers and politicians, leading scientists, researchers, engineers, as well as executives and representatives from companies and organisations.

For more information please contact the Conference Director, Mr Tomas Ekbom, +46-8-441 70 83, tomas.ekbom@svebio.se.

WHAT TO EXPECT

The conference offers three days with +150 decision-making attendees from the entire value chain: feedstock to consumer brands via policy, technology, finance and innovation. It’s a one-stop-shop to meet new partners from across the entire advanced biofuels sector, at one time in one place. Six sessions will comprise the conference with the following topics:

1. POLITICAL STRATEGIES AND VISIONS – HOW TO REDUCE TRANSPORT EMISSIONS AND DEPENDENCY ON FOSSIL FUELS

In hindsight, different policies (e.g., mandates, quotas, carbon tax) have had different and sometimes conflicting effects – what works, what does not and why?

2. ADVANCED BIOFUELS FOR EUROPE – PARTNERSHIPS AND CHALLENGES FOR BUSINESS OPPORTUNITIES

The last 18 months have seen a surge of investment announcements into advanced biofuels for road, rail, marine and aviation. The Nordic forest industry has been a major driver but also European agriculture as well as urban green waste and wastewater treatment plants.

3. POLICY AND INDUSTRY PERSPECTIVES – POSSIBILITIES AND COMMERCIALISATION

What is behind this surge of investments - have investors found new confidence in advanced biofuel policies and policymakers or are there other factors such as technology “gamechangers” also in play?

4. FUTURE FOR ROAD TRANSPORT – WHERE ARE WE HEADING?

Some argue that G-mobility (gas) is the low-carbon bridge to fossil free E-mobility (electric) others are pushing for E-mobility directly by proposing bans on diesel and gasoline internal combustion engines (ICE). However, ICE’s will be around for decades to come not just in road vehicles but also in working machinery and stationary generators.

5. CLEAN BIOFUELS – THE BRIDGE TO FOSSIL FREE TRANSPORT

Many of ICE’s in cars, trucks and working machinery can be made to run on clean biofuels such as biodiesel, HVO, E85, ED95 or biomethane that are available today.

6. BIOFUELS IN AVIATION AND MARINE TRANSPORT – WE ARE FLYING AND SAILING GREEN

The International Civil Aviation Organisation (ICAO), the IATA and the International Maritime Organisation (IMO) have targets to reduce CO₂ emissions from aviation and shipping by at least 50 percent by 2050 compared to 2005 and 2008 respectively. The challenge for the former is that with the exception of niche applications, high energy dense liquid fuels are the only option for the foreseeable future. Shipping has a range of options.

WHEN AND WHERE?

Pre-conference study visits: 17 September, 2019 (Open for conference delegates only)
Conference: 18–19 September, 2019, Stockholm, Sweden
Conference Dinner Cruise: 18 September, 2019
Join us for a spectacular evening dinner cruise on Lake Mälaren and enjoy a fantastic dinner while passing several cobs and islands around Stockholm.
Venue: Elite Hotel Marina Tower, Stockholm, Sweden
More information and registration: AdvancedBiofuelsConference.org
Please contact us for any questions: abc@svebio.se

BOOK YOUR ACCOMMODATION BEFORE 16 AUGUST 2019!

There is a limited number of rooms reserved for conference delegates until 16th of August, or until the room reservation block has been filled.
Please use this link to reserve your room at our special rate.

Elite Hotel Marina Tower:
Saltsjöqvarns Kaj 25, Stockholm, Sweden
konferens.marinatower@elite.se or phone +46 8 559 017 46

SPONSORSHIP OPPORTUNITIES AND MINI-EXPO STANDS

It is expected that Advanced Biofuels Conference will be attended by delegates from all over the world. For information about sponsorship and mini-expo stands (roll-up banner and table), please contact: Dorota Natucka-Persson, +46 704 01 91 40, dorota.natucka@bioenergyinternational.com

EXPLORE STOCKHOLM

Stockholm is a beautiful city with water all-around and September is the perfect time to explore it. We encourage guests of conference participants enjoy Stockholm, taking the opportunity to look at the city attractions.
