

MÖJLIG TESTPRODUKTION AV 300-500 TON SAF / ÅR

(SAF = SUSTAINABLE AVIATION FUEL)

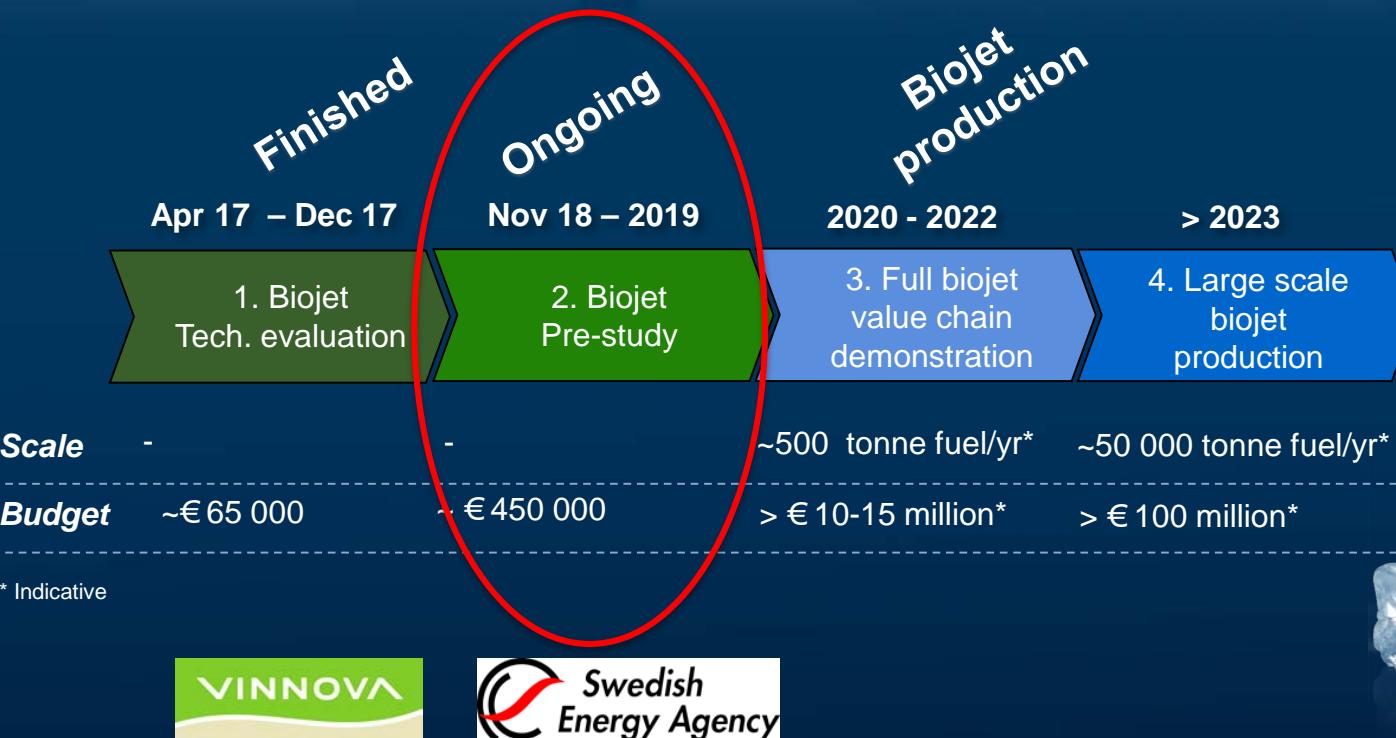

Forest
industry
Sweden

3. Nytt processteg (FT + upparbetning) för produktion av biojet & nafta.
4. Produkter till lagerområde för distribution.
1. Förgasningsanläggning för omvandling av biomassa till syngas
2. Ny elektrolyös för omvandling av förrbärbar el och vatten till vätgas och syrgas. Därigenom ökad biogen koffektivitet till slutprodukt.

BIOJET INITIATIVE

BIOJET PRE-STUDY

NOV 18 – 2019, VALIDATION AND DEMONSTRATION OF FOREST BASED BIOJET FUEL, STEP 1.

Partner

Role

- End user of Bio Jet
- Business case development

- End user of Bio Jet
- Business case development

- Bio Jet fuel certification & distribution
- SAF project development knowledge and experience
- Business case development

- Business case development

- Communication
- Business case development

Support from

Partner

Role

- Commercial offer and cost estimates for gasification equipment
- Gasifier equipment supplier, scale-up
- Business case development

- Technology provider with relevant FT technology
- Interested in developing and demonstrating their technology

- Pulp Mill owner & operator
- Feedstock provider
- Business case development

- Largest forest owner in Sweden
- Business case development

- Technology scale-up
- Extensive experience with the existing gasifier
- Techno-economic analysis

- Pilot plant ownership and operation
- Knowledge & experience with gasifier operations
- R & D of gasification technology etc.
